- 9.30 - 9.45 **Progress and current trends in higher technical education**
Professor Sandra McNally, Director, Centre for Vocational Education and Research, London School of Economics and Political Science
Questions and comments from the floor
- 9.45 - 9.55 **Institutes of Technology (IoTs) - an international perspective**
Professor Brian Norton, President, Dublin Institute of Technology
- 9.55 - 10.45 **Key issues for delivery - funding mechanisms, higher apprenticeships and establishing IoTs**
With the Government currently looking at how to extend technical education reforms to Level 4 and 5, and in light of its Review of Post-18 Education and Funding, how should funding mechanisms incentivise learning providers to offer options which meet suitable skills needs? What support do teachers of STEM subjects need to be able to develop a higher skilled workforce? Does more need to be done to achieve parity of esteem between higher technical education and academic education, and to what extent can these two approaches be better blended? As the uptake of higher apprenticeships increases, what further opportunities exist to upskill or retrain those already in full time work? With the first IoT expected to open in September 2019, what are the next steps for collaboration between employers and FE and HE providers, and what more needs to be done to increase workforce capacity and capability in areas where there are technological skills shortages?
Charles Ewen, Director of Technology and Chief Information Officer, Met Office
Vicky Knight, President, University and College Union
Dr Julie Mills, Principal and Chief Executive, Milton Keynes College
Mia Airoll, Structural Technician, Structure Workshop
Questions and comments from the floor with **Professor Brian Norton**, President, Dublin Institute of Technology
- 10.45 - 10.50 **Chair's closing remarks**
Senior Parliamentarian
- 10.50 - 11.15 Coffee
